F: 8kg/mm - 200mm - ID60

R: 5kg/mm - 200mm - ID60

Car height adjustable range

/ compared std height

F: about -10mm ~ -50mm

R: about +20mm ~ -30mm

- We have aimed for refinement in street sports driving. The fundamentals of performance were pursued in "good drivability" and "good stability" the result can surely be felt in "the pleasure running" and "steering joy".

- Cover a wide range of damping characteristics from "daily drive" to "sports driving at the circuit" via a 12 step damping force adjuster.

- Car ride height and spring pre load can be adjusted separately with the adjustable bottom bracket.

- Green chromate surface treatment. (Optional on other models in our range, STD on this model. Anti-corrosion performance is double or more, when compared with the STD gold color spec surface treatment.)

- Height adjustment wrench (two wrenches, one set).

- Spring rate can be changed when ordering (where applicable).
